HONEY

Colour isn't necessarily a guide to the strength of honey's flavour, but as a general rule lighter is milder and darker is fuller flavoured. Paterson's Curse and Thistle are examples of mild honey, while strong flavours are associated with native trees such as Ironbark or Bottlebrush.

COTTESBROOK HONEY incorp. CABONNE COUNTRY HONEY

Professional beekeepers who migrate their beehives around the Central West. Bulk and retail supplies of floral honey varieties, honeycomb and beeswax.

*Also offering a range of fine food lines

* Phone for further details

NUTS

Climate makes the Orange Region one of the country's leading nut-growing areas. Hazelnuts, walnuts, chestnuts and almonds all grow well here. The hazelnut industry is the strongest commercial crop, with ties to Mudgee through Bristowe Farm Hazelnuts, who provide nursery stock and value-add their produce.

Orange resident David Ogilvy is president of the Australian Chestnut Growers Association and is the industry pioneer within this country. Chestnuts, hazelnuts and walnuts can be grown organically in most instances with relative ease because there are few natural pests and diseases.

BRITTLE JACKS CHESTNUT FARM

Fresh Chestnuts, including the Red Spanish and Italian Marone varieties.
